

Research Study For People with Peanut Allergy

Pharmaceutical Research & Consulting, Inc. is conducting a research study with an investigational medication for adolescents and adults with peanut allergy. If you (or your child) are between the ages of 16-55 and have been diagnosed with or have symptoms of peanut allergy, you may be eligible to participate.

Qualified participants will receive at no cost:

- Study medicine and study-related office visits
- Study-related exams, ECG, and lab work
- Evaluation and supervision by board-certified allergists
